

The image shows a user profile page for 'Maximus' on the 'SOCIAL SQUIRREL' app. The header features the app's logo and a menu icon. The profile section includes a placeholder for a photo, the user's name 'Maximus's Climb to Success', location 'London, UK', status 'Newbie', and '100 hours of study to go'. Below this is a 'Last studied / updated' section with three exams: Exam A (Today / Today), Exam B (5 days ago / 2 days ago), and Exam C (7 days ago / 4 days ago). The main content area is titled 'Exam A' and features a progress bar with five dots, the first of which is filled. It includes a vertical bar chart showing progress, a squirrel icon, and text indicating 'Currently on the 31st floor', 'Spent 10 hours climbing 2 floors last week.', and 'Spent 40 hours on this exam so far'. At the bottom, a 'This week so far' section displays four metrics: 2 bear tokens collected, 12 tasks completed, 5 hours studied, and 1 hour rescheduled. An 'unfriend' button is visible at the very bottom.

"Search Profile" takes them to the current Invite & Share page. So this page now is only accessible from Social Squirrel.

They land on their own profile when going into SS.  
No more 'studiers of the day' page.

No more buddy notifications.
